How are your network skills?

What is Networking?

- Using social/work contacts to help yourself find a job or learn more about a field of interest
- Telling your contacts your story to get job leads and information about opportunities
- A reciprocal relationship

Why Network?

- 80% of jobs are never advertised (rileyguide.com)
- 80% of jobs are obtained through networking (Harvard Business Review)
- As the job market becomes more competitive, employers are more likely to hire someone who is recommended

Where and how do I start networking?

- Create a 30 - 60 second Self-Commercial Name, field of study, year in school, summary of work experience, and career goals
- Talk to people in your network of personal relationships, professional relationships, organizations, community, and even random people you meet every day!
