History/African studies Fall 2014
Carnegie 112

Introduction and Course Objectives

In an ever expanding global village, people are coming into increasingly greater contact with peoples of diverse cultural backgrounds very foreign to their own. Among the least understood of these examples in many western societies is the image of Africa and the vastly diverse people who inhabit the continent. Many westerners have been bombarded by a variety of biased images and opinions that depict Africa as a monolithic "Dark Continent", spawning only exotic animals, and static "tribalism". But what can we make of this image of Africa? Where does it come from? And how has pervasive usage of terms like "Tribalism" shaped how the world has viewed Africa throughout history?

By surveying historical developments over the last 500 years of Africa’s past, one will see a wide variety of peoples and cultures tackling a range of issues in their daily lives. From global historical forces such as the Atlantic slave trade and colonialism, to local cultural beliefs and environmental conditions----this course will introduce you to the contemporary socio-cultural varieties of African societies while addressing an array of historical issues that has affected the continent. Course materials and readings are designed to give special emphasis to African initiatives and perspectives of shaping their own history. Continent wide issues will be addressed in many cases through local examples from diverse areas of the continent, giving students a chance to see how broad issues impact Africans on a local level. Ultimately the goal of this course is to provide students with a wide interdisciplinary introduction to African studies, so that students can interpret contemporary African issues with an informed historical background. At the end of the course I hope that students will be able to see how Africans have participated in world historical events as well as explain the many external and internal forces that have shaped African societies, particularly over the last two centuries.

Throughout the course, we will explore these questions and issues in an open academic environment, as students will not be spoon-fed facts and figures in merely lecture format. On the contrary students will be challenged throughout the semester to develop their own answers to some of these questions and flesh out their thoughts and arguments through discussion, and writing. Therefore a secondary benefit to learning the "content" of this course is to develop the skills to enable students to better research and articulate their thoughts on the subject. These skills will not only enable students to gain a new perspective on African history and society, but also develop important life skills, which they can carry on with them throughout their academic and professional careers.

Course Policies

Due to the important nature of student participation in this class, students are expected to have assigned readings done before the scheduled class period so that they will gain the most out of class discussions and lectures. Also, students will be expected to attend all class sessions.
Frequent absences will make it difficult to stay on top of the material and negatively affect your course engagement grade. Frankly speaking if you do not think you can attend class regularly this is not the course for you. Students will also be required to turn in all course assignments on or before the specified due date. Failing to do so will result in a ten point penalty on the assignment grade for everyday late (up to 3 days then the assignment will not be accepted).

A note on classroom etiquette (Please refrain from the following in this course)
1. Coming to class habitually late
2. Having your cell phone go off in class or using it for text messaging.
3. Not having assignments printed and stapled when they are due.

* Note, Laptops will not be permitted in class unless special accommodation is needed. Please see the instructor in advance if you need an accommodation.

Grading and Assignments: (the total course grade will be out of 1000 points)
(Note-Pass/Fail is not allowed in this course)

Class Engagement (10%): Participation and active engagement in class discussions are essential components of this class. Not only do I expect students to attend class regularly but also ask questions and participate in discussion. **Since you are being evaluated on your engagement in class I expect you to take your own initiative to play an active role in class discussions and activities. Simply said---If you plan to sit quietly in class and not engage with your peers all semester this is not the course for you!**
With this in mind however, I do not expect course engagement to simply mean always contributing “brilliant and innovative ideas.” On the contrary by simply asking questions when you are confused, coming to my office to discuss course materials or engaging your colleagues in small group discussion are all perfect ways you improve your course engagement.

Rubric for Course Engagement:

3.25-4.0- Student came to class each day fully prepared (see below) to discuss the assigned reading. He/she frequently contributed to classroom discussions on his/her own initiative, and regularly asked questions when material was unclear.

2.0-3.0- Student came to class prepared to discuss and/or ask questions about the assigned reading. The student responded to directed questions by the instructor but did not take much initiative to engage with the class discussion on his/her own.

Below 2.0- Student came to class only partially prepared to discuss the readings (ex. participated in discussing only one of the assigned readings for the day). Student often sat quietly during classroom discussion and took little or no initiative to offer his/her own input.

Tips on being prepared for class

1. Finish all readings before class.
2. Bring each reading to class with you and be prepared to refer to specific passages.
3. Try to highlight the author’s argument and be able to summarize it in a few sentences.
4. Jot down any gaps, weaknesses or disagreements you may have with the author’s argument.
5. Take notes on each of the readings, write down questions you have and underline passages which are unclear.
6. Be a true historian and examine the footnotes, citations and bibliographies of readings to have a sense of the types of sources authors use to back up their arguments.

Map Quiz: (10%) A basic knowledge of African geography is essential for students to be able to gain the most out of this course. Plus you will wow your parents and friends by being able to name the source of the Nile or specifically where the infamous "Timbuktu" is. The quiz will be 25 questions, to be numbered on a blank map. Students should refer to the back of the syllabus for the potential items to be on the quiz.

Reading Quiz (10%): a basic content quiz for one of the historical novels will be given on the day the novel is due. The quiz will consist of a series of short answer questions about the story and characters of the book. Basically if you read the novel carefully you should do well on this quiz. Note that make-up quizzes will not be given without a legitimate documented excuse.

Response Paper: (20%): For one of the historical novels we read in this course you will be asked to write a 5-6 page response paper. You will be given a question and a list of potential topics for the response paper before we read the novel. The paper will not only ask you to discuss the broader significance of the story but also relate it to at least one additional scholarly source.
Clarity of argument, and critically engaging the text in your response is an essential component to this assignment and you should refer to the below guidelines for clarification (Note we will also discuss some basic writing tips for this paper prior to the assignment)

Written Work: General guidelines
All written work is expected to be double-spaced and typed, using 12 font and one inch margins. All assignments are expected to have a clear introduction with a defined thesis, followed by a well-structured body and conclusion. Students are reminded to carefully proof-read their work, as mere computer spell checking cannot detect all grammatical and structural errors. Also, all sources consulted are expected to be properly cited. In terms of grading the following scale will be used in evaluating written assignments

20%- Overall style and creativity of the work
40%- Structure and Argument
40%- Reading of Sources, use of evidence and proper citations.

(NOTE: Plagiarism/Academic Dishonesty of any kind is completely unacceptable in this course and may result in penalties that could include failing this course. Please consult the student handbook for more on this policy)

Exams: (50%): The format and layout for the exams will be discussed in advance during class time. Make-up exams will only be given in extreme cases and note that only documented excuses will be accepted for missing a scheduled exam time. If you have a legitimate conflict or need special accommodations, please see the instructor in advance.

Extra Credit Option Throughout the semester there will be a few African studies lecturers and performances where you will be able to attend a write a reflection for up to 10 points of extra credit. If you have a university, family or employment related conflict that does not allow you to attend these events you can review one of the films below as well. (Note all students can submit a maximum of two extra-credit assignments each).

Throughout popular culture we are rarely given the opportunity to see African societies or historical events accurately depicted in film. You have the opportunity to add up to 10 points (or 1%) on your final course grade by examining the historical validity of any one of the below films. To receive the extra-credit, watch the film and write a 2 page typed critique of the film from the point of view of an African historian. Examine the historical accuracy of the film and any misinformation the film provided. Also explain any biases that you saw in the film towards African societies and argue overall if you think the film has any educational value. In your analysis you must cite at least 2 additional historical sources outside of the course readings that relate to the topic discussed in the film. (Note Web sources outside of approved academic databases such as Academic Search Complete, JSTOR or Project MUSE are not acceptable)

(All extra credit assignments are due on or before 12/9: Approved Films shown below (If you want to substitute any other below films, see the professor first for approval)
