Different Skills Involving Homesteading

**littleGRASSE FOODWORKS**

an interactive community food project

---

**Beekeeping**

- Even the Russian Bees were no match for the harsh winter

---

**Cold Frame Building**

- Utilizes solar energy and insulation to create a mini microclimate
- Offers protection for plants
- Extending the season

---

**Raised Beds and Row Covers**

- Raised beds provide a walkway and soil retains heat faster
- Row covers provide protection from the extreme weather conditions and protect plants from insects

---

**Planting Snow Peas**

- The snow peas were inoculated allowing the peas to have a higher success of germinating and allowing more nutrients for the soil and plants

---

A thing is right when it tends to preserve the integrity, stability and beauty of the biotic community. It is wrong when it tends otherwise.

— Pope Leo XIII
